

What is the Learning Hub?

Powered by
Health Education England

The Learning Hub will be a powerful new digital platform that will provide easy access to a wide range of education and training resources for the health and care workforce.

It is being developed by Health Education England's (HEE) national Technology Enhanced Learning (TEL) Programme.

The Learning Hub will be the place to go to access and record learning from a broad range of shareable resources, including existing e-Learning for Healthcare (e-LfH) programmes, and resources contributed and uploaded from the user community.

The Learning Hub will also encourage discussions to take place around the uploaded learning content and networks to form around areas of shared interest to maximise the opportunities for collaboration and realise the potential of the resources.

Can you help with the development of the Learning Hub?

User involvement has underpinned the Learning Hub project from its inception and users have been consulted at every stage of the process to date. This has included developing the case for need, preferences on functionality, the name of the platform, access criteria and the governance and integrity around the system.

Our users' role in shaping the development of the Learning Hub is vital in ensuring a design approach that focuses on what users want and need as well as alignment to Government Digital Service's (GDS) recommendations.

If you would like to play a role in the user research activities, please follow the link below to register your interest. By completing the survey, you are providing us with a greater understanding of how you wish to be involved and your preferred methods and formats of research to be involved in.

To have your say on the development of the Learning Hub email our user research team: user.research@e-lfh.org.uk
