

# TEL Platforms Roadmap

## Completed

### DLS Tracking System

Refactored to meet GDS requirements.

### Nursing competency passports

IV Therapy and Critical Care competency passports private beta release.

### Bookmarks

Providing the ability for users to save learning resources in a single place.

### Catalogue administration

Owners of learning catalogues will be able to structure packages of learning material into logical folders and sub-folders.

## Current/Next

### Competency assessment passporting

Allowing competency passports to be carried between organisations.

### Digital Staff Passport

Functionality developed to support Postgraduate Doctors rotations across Trusts as part of the NHS E/I Enabling Staff Movement Programme.

### SSO deep link to catalogues

Further extending the ability for users to directly access a catalogue from single sign-on links.

### Whole slide image zone

Expanding the way users interact with images, by providing the ability for areas of an image to be 'highlighted' with notation.

### Match game

Extending the question types provided, by giving the ability to ask users to match a question and answer together in a 'quiz style' manner.

### Z-stack - whole slide image

Broadening the image functionality which will allow a user to 'stack' images together and then for wider users to be able to 'scroll' through these interactively.

## Future

### Single shared user

User profile/login details will be consolidated allowing a single set of credentials to be used across our platforms.

### Unified reporting

Expand our ability to report on learner progress from a single data warehouse across our platforms.

### Access (elfh migration)

Broadening the ability for different user types to access the platform and content relevant to them.

### Learning logic (elfh migration)

Presenting content to the user in a predetermined sequence requiring ordered completion to progress.

### Content structure (elfh migration)

Extending the content structure facility to include higher levels of organisation such as Courses to provide syllabus based content to users in an organised way.

### Certificates (elfh migration)

Expanding the functionality to allow digital and printable records of completion of resources, either individually or as a collection, with optional pass marks.

### Support administration tools (elfh migration)

Enhancing tools to support our users using our platforms.

### Search and taxonomy

Enhancing content tagging and filtering functionality to give users more focused results.

### External content launching interface (elfh migration)

External launching of content by approved 3rd party LMS's.

### Payment systems (elfh migration)

Payment functionality will be deployed into the platform where there is a need to pay to access content.

### Competency Frameworks Workforce Manager Interface

Increasing admin functionality to enable the creation and distribution of competency profile self-assessments.
